MALAYSIA AUSTRALIA
Free Trade Agreement

Malaysia-Australia Free Trade Agreement Agricultural Products and Processed Foods

Under the Agreement, Malaysia allows large annual increases in import volumes of **liquid milk**, while maintaining a tariff quota system. Malaysia also provides a liberalised licencing arrangement for liquid milk exporters, which allows access for higher value retail product.

Malaysia eliminated virtually all tariffs on **processed foods** from entry into force of the Agreement.

Malaysia gave a guarantee that Australian **wine** exporters will receive the best tariff treatment given to any country.

Malaysia will remove all import licence restrictions on Australian **rice** from 2023 and eliminate all tariffs three years later.

Malaysia guaranteed tariff-free treatment for the vast majority of agricultural products from entry into force of the Agreement. Australian agrifood exporters of these products benefit from:

- **business-friendly rules of origin** provisions. Australian exporters do not need to supply a certificate of origin, but rather a simpler declaration of origin.
- arrangements which make it **easier** for Australian goods sellers and investors **to work** in Malaysia, and to stay for longer periods.
