* Vanuatu Police Force Criminal Records Office “Crime Statistics 2004” (Table 2: Crime Category); Vanuatu Crime Statistics “Summary Blong 2003” (Table: Age Group by Sexual Abuse Only 2003); and Vanuatu Police Force “Crime Statistics 2005”:6. The figure for 2005 is the total number of crimes against morality for 2005 – the report does not provide a breakdown of the number of cases of sexual assault within the broader category of crimes against morality, which also includes prostitution. As a result it is not possible to calculate the % increase from 2004 to 2005 in the number of sexual assaults.

Vanuatu Police Force, Family Protection Unit “Statistics 2007”. This data differs from that provided in the PDD because the data on sexual offences reported over time (Table 5) in this report is different to previous data provided by FPU. Note that the FPU statistics are crimes reported to the Port Vila office of FPU, whereas the Crime Statistics are supposed to cover Vanuatu as a whole. The lesser numbers may be explained by the number of cases reported, compared with cases actually detected, although it is not possible to verify whether this is the reason for the different figures. 2009 FPU figures provided by phone only.
