Indonesia is a close neighbour and a partner of first order importance – as reaffirmed by the Foreign Policy White Paper. A prosperous, stable and growing Indonesia is good for regional stability, security, trade and cooperation. Australia works with Indonesia to target the fundamental constraints to its growth and poverty reduction.

Strategic direction

Australia’s development cooperation with Indonesia supports **economic growth** and stability by improving competitiveness and strengthening the impact of Indonesia’s resources. Our economic partnership with Indonesia has **three key objectives**:

- effective economic institutions and infrastructure;
- human development for a productive and healthy society; and
- an inclusive society through effective governance.

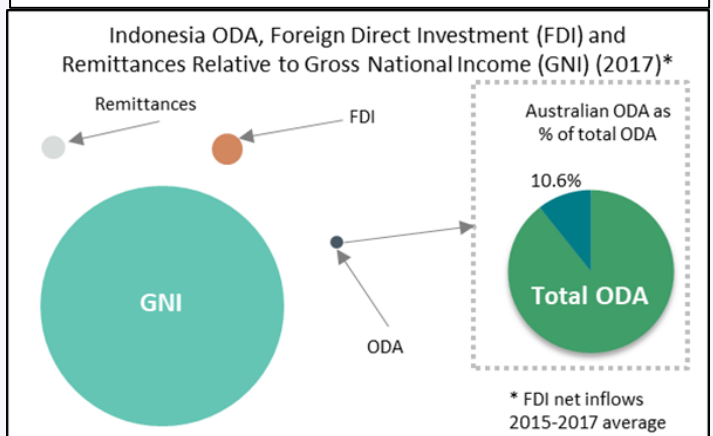

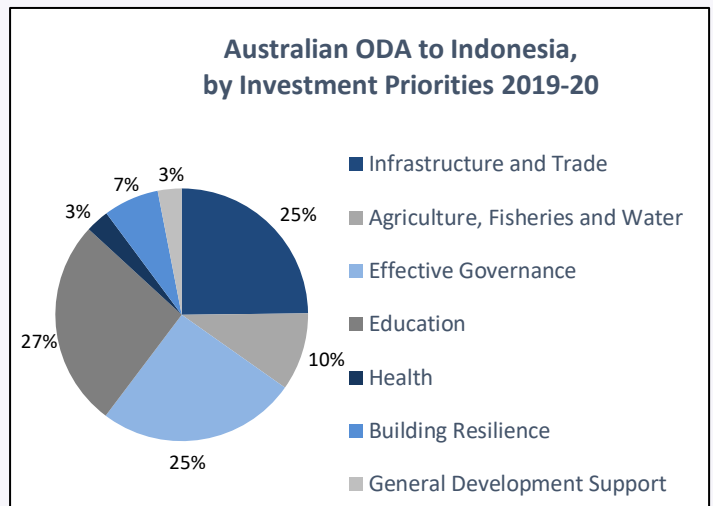

Our work in Indonesia contributes to achieving the Sustainable Development Goals (SDGs). We do this by: improving the lives of **poor women** through increased access to jobs (SDGs 5 and 8), **social protection** programs and improved conditions for overseas work (SDG5); improving access to **water and sanitation** (SDG 6) and **infrastructure** (SDG9); promoting strong, sustainable and **inclusive economic growth** (SDG8); and helping to improve access to justice (SDG16).

Program highlights

- In 2018-19, Australian support contributed to:
