

30 March 2026

FTA Modernisation - General Review of IA-CEPA  
Regional Trade Agreements Division  
Department of Foreign Affairs and Trade  
RG Casey Building, John McEwen Crescent  
BARTON ACT 0221

Via email: [ftamodernisation@dfat.gov.au](mailto:ftamodernisation@dfat.gov.au)

**RE: General Review of IA-CEPA**

Dear Sir/Madam

Grain Trade Australia (GTA) welcomes the opportunity to provide a submission to the General Review of the Indonesia-Australia Comprehensive Economic Partnership Agreement.

Indonesia is Australia's major wheat trading partner and thus, very important to the grain industry. There is considerable potential to expand the trade of feed grains and canola meal to Indonesia and thus, the grain industry is very keen to see the enhancement of IA-CEPA to support future trade.

**1. Grain Trade Australia (GTA)**

GTA is the leading post-farm gate industry association in the Australian grain sector, representing over 295 member organisations across trading, storage, handling, processing, and logistics.

GTA's core purpose is to **facilitate efficient, transparent, and competitive grain trade**, domestically and internationally. This is achieved through:

- An industry-managed framework including the **Grain Industry Code of Practice**, endorsed by the Department of Agriculture, Fisheries and Forestry (DAFF)
- Dispute Resolution services and supply chain assurance frameworks
- Trade and market access advocacy
- International engagement through the **International Grain Trade Coalition (IGTC)**, where GTA currently holds the Presidency.

GTA's role is directly aligned with the Committee's focus on institutional effectiveness, regulatory efficiency, and productivity-enhancing governance.

A list of GTA Members is attached.

**2. The Australian Grain Industry is large, growing and trade exposed**

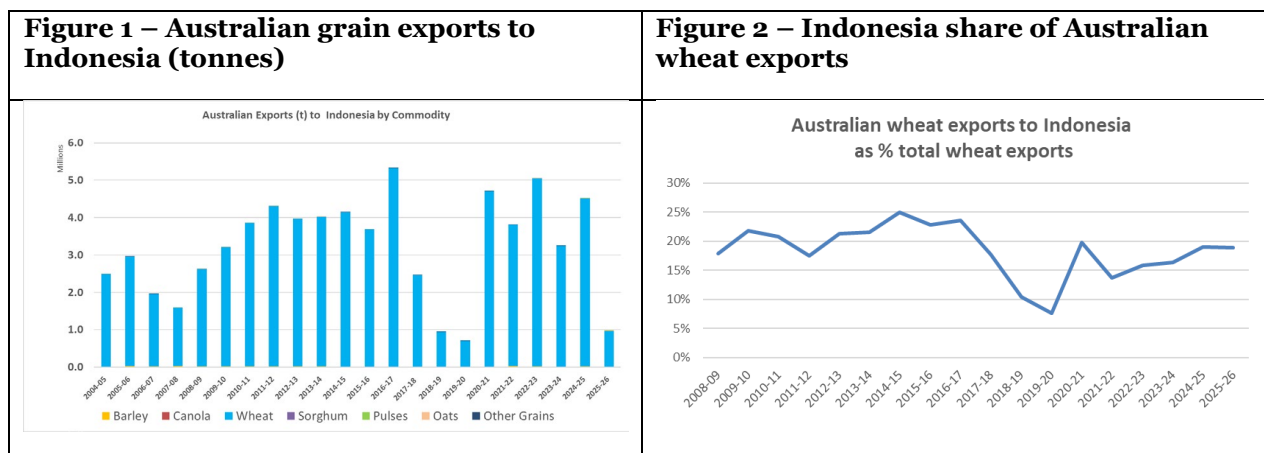

The Australian grain sector is one of Australia's largest and trade exposed agricultural industries, exporting over 70 per cent of production in a normal season. In 2025/26, grain production is forecast to total approximately **70.5 million tonnes**, with exports of **48.8 million tonnes**, valued at **\$22.8 billion** (ABARES, 2025).

The grain industry:

- Underpins other key agricultural and manufacturing sectors, including meat, livestock, pork, poultry, brewing, food processing, and aquaculture.
- Is a critical contributor to food security and economic stability in the Asia-Pacific region; and
- Operates in highly competitive, price-taking global markets

Indonesia, like south-east Asia more generally, is characterised by increasing population and income growth resulting in increased demand for protein. This is driving increased demand for food and feed grains.

### 3. Indonesia is Australia’s largest trading partner with potential to grow further

Australia has preferential access to Indonesia due to the AANZFTA and IA-CEPA market access outcomes. Attachment 1 provides an overview of Australian Grain Exports to Indonesia. Under AANZFTA tariffs on all grains were bound/reduced to zero percent upon entry into force. Wheat flour tariffs of 5% were phased to 0% by 2020 and tariffs on unroasted malt (5%) were phased to 0% by 2023. IA-CEPA eliminated outstanding tariffs not eliminated under AANZFTA on most remaining cereals and grains industry including a five per cent tariff on rolled oats and unroasted malt.

However, despite this tariff reform, a number of issues impacting potential trade with Indonesia remain.

### 4. IA-CEPA implementation issues

As noted above Australia has tariff free access for most grains and this supports the long-standing relationship on food grain trade. However, Indonesia imposes barriers to imports of feed grain in an effort to protect its domestic corn industry.

GTA, and the grain industry, advocated at the time of the IA-CEPA negotiations that Australian feed grains would complement local corn production and support expansion of the feed milling sector to meet the growing demand for protein. This remains and has become more evident in the period since IA-CEPA was signed.

A recent study undertaken by GTA as part of DFAT’s SEA Modernisation Grant program estimated that Indonesian feed demand will exceed 26 million tonnes by 2040 with a wheat import gap of more than 6 million tonnes assuming all local corn production and current imports are consumed.

IA-CEPA provided Australia with a duty-free access for 500,000 tonnes of feed grains (wheat, sorghum and barley) in the first year of IA-CEPA, with a 5% annual increase in volume thereafter (currently 638,141 tonnes). However, there have been considerable challenges, notably apparent political blockages within the Indonesian system, in implementing the feed grain Tariff Rate Quote under IA-CEPA and to date the quota remains unused. This centres on the difficulty in accessing import permits despite IA-CEPA promising automatic permits resulting in a significant gap between the FTA terms and on-the-ground experience.

## 5. Usage of IA-CEPA feed grains quota

Table 1. History of IA-CEPA Feed Grain

Year	Total quota for Year 6 (TN/head)	Unreserved	Unallocated	Total shipped (TN/head)	Balance remaining (TN/head)
2020 part year	244,533	244,533	NA	0	244,533
2021	525,250	525,250	NA	0	525,250
2022	551,250	551,250	NA	0	551,250
2023	646,797	646,797	NA	0	646,797
2024	672,669	672,669	NA	0	672,669
2025 (to Dec 25)	638,141	638,141	NA	0	638,141

Source: DAFF<sup>1</sup>

While recognising that there may be times when market conditions (such as drought in Australia or low domestic Indonesian corn prices) may not be conducive, the difficulty in accessing import permits under IA-CEPA is anecdotally due to lack of support within Indonesian Government agencies. It appears these agencies have provided import permits directly to state owned (or previous state owned) enterprises rather than through the IA-CEPA program. This is of concern as it is outside the stated objectives and commitments of the IA-CEPA and lends itself to limiting competition and efficiency (and consequently growth) in the Indonesian market. This is contrary to the IA-CEPA's stated objectives of unlocking mutual economic potential.

While the Australian Government has raised this issue in various forums, it is unlikely that any feed grain tonnes will be traded under the IA-CEPA unless a more determined approach is taken by the Australian Government, **at the highest (i.e. Prime Minister) level**, to engage and persuade Indonesia to support IA-CEPA and the commercial trade of feed grain from Australia into Indonesia.

The action by Indonesia to place restrictions on imports of feed grains (including feed wheat, barley, corn) to support domestic corn producers is adversely impacting both Indonesia and Australia. These restrictions impede Indonesia's stated goal of growth and development of value-added economic activity, through the growth and promotion of domestic manufacturing industries, including developing export markets for the value-added Indonesian products (such as poultry products and packaged foods).

Australian feed grains, particularly feed wheat, barley and sorghum, offer a consistent source of feedstock for Indonesia's stockfeed manufacturing sector, thereby supporting Indonesia's goals of food security, improved health and nutrition (protein) whilst transitioning and growing its value-added sector. Such imports would be complementary to local corn production through broader economic growth stimulating overall demand.

### **GTA would urge the Government to enable execution of and expansion of the feed grain quota.**

There is potential for considerable additional growth in feed grain trade to support the Indonesian Government's Nutritious Meals Program (NMP). This is largely focused on the dairy industry and offers significant opportunity for canola meal and feed grains. However, these opportunities remain tempered by Indonesia's focus on its self-sufficiency and domestically sourced corn. There is an opportunity for the mutual benefits of trade to be recognised and for a more trade facilitative approach to enable access to this opportunity.

## 6. Areas for modernisation of IA-CEPA

There has been considerable development in the trade environment since the IA-CEPA was signed and there are a range of areas where the agreement could be modernised and enhanced.

As discussed, there is opportunity to create a more trade facilitative environment through creating a greater understanding of the mutual benefit of trade to support Indonesia's self-sufficiency and/or food security ambitions and support economic resilience. This would demonstrate that Australian imports will not displace local production but rather complement and improve the productivity of local livestock and food processing industries that will support both domestic food security and export of value-added products.

<sup>1</sup> <https://www.agriculture.gov.au/biosecurity-trade/export/from-australia/quota/usage/historical-ia-cepa>

Key areas where GTA believes that the IA-CEPA could be modernised for the benefit of both parties are:

- a) **Sustainability** – there is increasing incorporation of sustainability references in trade agreements, however this can present challenges for the grain industry, in particular, where one country attempts to impose their standards and practices on another without recognising the unique and/or different characteristics of the environments in which each party operates i.e. one size does not fit all. Further, when importing countries apply their environmental requirements to producers in exporting countries, these can be discriminatory and burdensome and add complexity to the regulatory landscape, increasing compliance costs for businesses and be of no commercial value. The International Grain Trade Coalition<sup>2</sup> (IGTC) has developed a set of principles (attached) which can inform trade agreements.
- b) **Seed innovation** – these tools are rapidly evolving, and it is important that trade agreements reflect, facilitate and support ongoing innovation. Seed innovation has the potential to deliver global benefits in terms of resource use, food security, climate change and sustainable and resilient food systems. However, the grain trade needs regulatory pathways that are workable and do not create unnecessary risks and trade barriers. Clear and predictable import policies for grain are critical. Gene-edited crops are currently subject to pre-market requirements in some jurisdictions, and voluntary processes in others. Importers and exporters are increasingly expected to understand and navigate these frameworks. There is an opportunity to imbed principles that enable import policies and procedures for grain that are transparent, science-based, and aligned with international trade commitments, while also being achievable by grain traders.
- c) **Digitalisation** - The use of e-certificates has demonstrated benefits in the efficiency of SPS compliance verification processes time and cost and potentially reducing the risk of fraud. A modernised FTA should promote the use of e-Phyto and other digital documentation.

## 7. Conclusion

GTA is very supportive of the IA-CEPA to strengthen trade and economic ties with a key trading partner.

While IA-CEPA provides the framework for growth in opportunities with Indonesia, this has not been effective to date. There is considerable opportunity for further growth in trade between the two countries and thus, GTA urges the Government, at the highest level, to seek effective execution of the existing quota and expansion of this.

Market access will be maximised through active, ongoing collaboration between Government and industry, effective implementation of agreements, and sustained reform of both tariff and non-tariff barriers.

The relationship between the Australian and Indonesian grain industry is strong and goes beyond just trade. There has been a commitment to capacity building and technical support which will continue. However, there is opportunity to enhance this through the IA-CEPA.

It is also important to recognise that the economic value of Australian industry depends on more than trade alone. Competitive advantage and value are also driven by efficient, modern supply chains. Collaboration between Government and industry is critical to boost productivity, reduce costs across the grain value chain, and maintain Australia's hard-earned global reputation for high-quality grain.

Thank you for this opportunity to comment. Please do not hesitate to contact GTA at any stage to discuss further.

Yours faithfully,

---

<sup>2</sup> IGTC is a coalition of organisations and stakeholders committed to promoting a predictable, rules-based global trading environment for grains, oilseeds, pulses, and derived products. By working with governments, international organisations, and supply chain partners, IGTC supports practical, trade-facilitating policies that ensure a reliable supply of grain and contribute to global food security. With members across six continents, IGTC brings a trusted voice and industry expertise to issues of shared interest, supporting science-based, risk-proportionate policies and regulations for the global grain trade. IGTC works to advance trade-facilitating international standards and practices to support global food security. GTA is an active member of the IGTC.

# Sustainability Principles

## For Resilient Supply Chains

### Support for Open, Rules-Based Trade

Sustainability policies and regulations that impact trade should comply with existing WTO rules and agreements, particularly regarding non-discrimination, transparency, and predictability. Sustainability measures should not become unintentional barriers to trade or serve protectionist interests.

### Outcome-Focused and Science-Based

Sustainability measures should be grounded in recognized science and evidence-based metrics, ensuring there are clear pathways to support climate resilience, emissions reduction and environmental outcomes (e.g. soil, water, air, biodiversity) without adding barriers to trade or hindering innovation.

### Protection of Global Food Security

International trade plays an important role in the reliable delivery of nutritious food worldwide. Sustainability measures should not unnecessarily restrict or redirect trade flows in ways that could undermine food security or limit access to essential agricultural products.

### No One-Size-Fits-All Requirements

Sustainability policies should acknowledge that diverse environmental, climatic, and resource conditions exist around the world. Rather than mandating uniform or prescriptive practices, sustainability measures should provide flexibility for regionally adapted approaches. While alignment on desired outcomes and targets is important, overly prescriptive measures for achieving them could inadvertently limit the use of locally effective solutions.

## Avoidance of Extraterritorial Application

Governments should refrain from imposing agricultural practices on other nations. Instead, sustainability policies and regulations must allow each jurisdiction the flexibility to pursue environmental objectives using the methods best suited to their unique agricultural systems.

## Sustainable Productivity Improvements through Innovation and Trade

Sustainability measures should enable practices and innovations that enhance productivity and resource efficiency, contributing to increased food production while protecting the environment. Trade plays a complementary role by facilitating the movement of sustainably produced grain to international markets, thereby reducing pressure on land and resources at the global level.

## Lead-time and Transparency in Policy Development

The grain industry operates on seasonal production cycles and grain may be held in storage for a time before it is used. Sudden changes to domestic policies and regulations, without adequate transition periods, can disrupt planting decisions, contracts, logistics, and inventories already moving through the global supply chain. To support investment in sustainable practices, farmers and the trade need policy certainty and time to adjust. Governments should introduce new sustainability measures only after extensive industry consultation and provide sufficient lead time so that supply chains can prepare, adapt and innovate to achieve the desired objective.

The International Grain Trade Coalition (IGTC) is committed to promoting a predictable, rules-based global trading environment for grains, oilseeds, pulses, and derived products. With members across six continents, IGTC collaborates with governments, international institutions, and supply chain partners to support practical, trade-facilitating policies and advance global food security.
