

KOMPAK, supported by the Australia Indonesian Partnership, is an innovative, demand-driven program that supports the Government of Indonesia (GoI) in its efforts to reduce poverty and inequality. KOMPAK supports the GoI to improve the quality of and to increase access to health, education, legal identity services, basic infrastructure and to increase job opportunities for the poor.

Working at both the national and sub-national levels, KOMPAK builds on the more than 20 years' experience Indonesia has had on decentralisation and community-driven development programs. KOMPAK strongly values strategic partnerships and recognizes that engagement with government, academics, private sector, and other like-minded organisations will bring stronger impacts and a higher likelihood of achieving program goals.

PURPOSE To support the Government of Indonesia (GoI) in implementing its medium term development plan for reducing poverty and inequalities.

KOMPAK STRATEGIES

1.

Supporting GoI re-align performance incentives and build the systems needed to deliver responsive and accountable frontline services.

2.

Supporting GoI embed village and community structure for inclusive community-driven development.

3.

Supporting GoI increase options for off-farm employment, labor mobility, and economic choice.

KEY KOMPAK PARTNERS

Bappenas; Ministry of Finance; Ministry of Villages, Disadvantaged Regions and Transmigrations; Ministry of Home Affairs; and Coordinating Ministry of Human Development and Culture.
