

Good Afternoon,

I read your call for submissions for Free Trade Agreement between Australia and Malaysia.

We are a processed dried fruit manufacturing company that is trying to grow in Malaysia, but due to the tariffs (which can change depending on the custom person that is clearing the goods) it makes it very hard to sell our fruits to manufacturers. The tariff rate varies between 10-30% which is hard to make profit on DDP quotes.

It would be great if some consideration is made, it would assist greatly in growing our business in Malaysia.

All the best,

Silvanna Morris
