Dear Sir

I would like to share with you my admiration for the Australian education system and especially the New National Curriculum that is Montessori based. It is such a great job IMHO.

Now should be a great opportunity to spread this excellence in Education within European countries, by including in the FTA a program for mobility of teachers and students at all levels, from Kindergarten to University, and providing a proper framework to facilitate the opening of Australian International Schools based in this Curriculum overseas, that could foster future connections between regions.

I wish this could be helpful.

And thank you for the opportunity to share our thoughts.

Mercedes Gil
