SUSTAINABILITY
Explore opportunities to engage more intentionally with CSOs
EFFECTIVENESS
Where there is momentum and appetite, scale up bilateral investments
Increase the spend on research, training and influencing, including more tailored, in-country training and cross-country learning
DFAT to consider new approaches to bilateral engagement in PICs with no/limited formal social assistance
DFAT and P4SP could be more ambitious and focused on gender equality
Continue the focus and ambition on disability equity in social protection
COHERENCE
DFAT and P4SP to explore opportunities to coordinate and collaborate more intentionally with other development partners
RECOMMENDATIONS
The program should be extended into a second phase
RELEVANCE
DFAT could leverage P4SP for broader Australian regional objectives (e.g. productive and inclusive growth, labour mobility, climate financing)
EFFICIENCY
DFAT and P4SP could invest in pursuing locally led development more intentionally
Allow the program to continue to increase its annual spending rate
Consider including an Intermediate Outcome on climate change
Consider taking Timor-Leste out of the program
Expand the investment in MEL and maintain some independence
Where there is a sizable bilateral investment, Country Engagement Plans could include country level theories of change and a MEL framework
